

Information Disclosure Citation  
Statement of Relevance  
AMPC 5046

The application is for an improvement to prior art in the area of multi-channel equalization. U.S. Patent No. 5,357,257 issued October 18, 1994, discloses a method and apparatus for performing multi-channel equalization which contains some inherent problems which are resolved by the improved apparatus and method of this application.

Neither the applicant nor his undersigned representative is aware of additional prior art which teaches or discloses the applicant's invention or which would render the invention obvious or unpatentable. Neither the applicant nor his undersigned representative is aware of any other information which, in their opinion, is material to patentability and which is not cumulative to information already of record in the application, or which further establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim.

Respectfully,

 1/29/04  
Dayn Thomas Beam
